

Title: Toolox - prehardened tool steel for reducing manufacturing time of tools.

Swedish ME Steel **supply special steel and complete wear solutions** in the Middle East and Indian Subcontinent. Swedish ME Steel is the provider of Toolox in the Indian Subcontinent and Middle East.

Based in Bangalore and with office in Pune & customers spread across the country, Swedish ME Steel Pvt Ltd offers **High tech services reimagined to customer needs.**

[Swedish ME Steel](#) conducted a webinar on **Toolox - prehardened tool steel for reducing manufacturing time of tools**. The webinar touch on the different areas of the [prehardened tool steel - Toolox](#) and how it can increase the productivity and lower the manufacturing time using conventional tool steel. It will also talk about the various application and its case studies from across the globe catering to various customer demands. We also covered Toolox is delivered pre-hardened and ready to use. It eliminates the need for heat treatment and adjustments, thus saving you time and money. And because of its low carbon content you can machine Toolox with ease. This is an interactive forum to learn each other on the latest trends about the material and also the process.

Key Takeaways from this webinar:

- ❖ Quality of Manufacturing process.
- ❖ No heat treatment required – Saves Money and time.
- ❖ Prehardened version of (P20, H13 and D2)
- ❖ Suitable for Multiple applications(Injection moulding, Press tools)
- ❖ Case studies from across the globe.
